# LOWELL ANIMAL FERTILIZERS

## To Progressive Farmers:

Due to the great European war, there is practically no potash in this country available for agricultural purposes. This scarcity makes those commercial fertilizers which depend on potash far too expensive for the majority of farmers.

Extensive experiments have been carried on by the Lowell Fertilizer Co. in conjunction with farm experts. The results have reveal that larger amounts of organic ammonia and phosphoric acid than are ordinarily used will practically act to the place of potash! We have made fertilizers from hattre's own prescription—saimal matter, consisting of Bone, Blood and Meat. These fertilizers have been tested, and in every instance they have proven that good crops can be grown without the added expense of potash.

Read this letter from a progressive farmer who has tried the Animal Fertilizer on his farm.

"In regard to fertilizers without potash, I used the three kinds you sent me, with good results. They were compared with a few tons of last year's goods containing 3 per cent potash. These I planted in plots throughout the field, a ton or so in the piot, and when I dug my potatoes. I could see very little difference in the yield. I shall probably use 30 or 40 tons of your fertilizer next year, and if I cannot get potash at a fair price, will use without potash.

E. J. PARKER, Patten, Maine."

You can make your crops good without paying abnormal prices for potash. See your nearest Lowell dealer or address LOWELL FERTILIZER CO., Boston, Mass.
